

Tony Li

Stony Brook, NY | haolili@cs.stonybrook.edu | [lhl08.github.io](https://github.com/lhl08) | [Google Scholar](#) | U.S. Citizen

EDUCATION

- 08/2024–Present **Stony Brook University**
Ph.D. in Computer Science; focus: Human-AI Interaction, LLM and GenAI
- 08/2020–06/2024 **University of Science and Technology of China (USTC)**
B.E. in Computer Science and Technology

PUBLICATIONS

- CHI'26 **LI, TONY**, MA, Y., LI, Z., YU, C., RAMAKRISHNAN, I., AND BI, X. Keysense: Llm-powered hands-down, ten-finger typing on commodity touchscreens
- CHI'25 XU, W., **LI, TONY**, WANG, Y., YANG, X.-D., AND WU, T.-Y. Bit: Battery-free, ic-less and wireless smart textile interface and sensing system
- VRW'25 MA, Y., **LI, TONY**, LI, Z., AND BI, X. Llm-powered text entry in virtual reality
- CHI EA'25 XU, W., **LI, TONY**, WANG, Y., YANG, X.-D., AND WU, T.-Y. Demonstrating bit: Battery-free, ic-less and wireless smart textile interface and sensing system

EXPERIENCE

- 06/2026–08/2026 **GenAI Research Intern, Samsung Ads**, Mountain View, CA
- Developed reusable **user embedding** methods for large-scale advertising systems, targeting efficient personalization under real-world serving constraints.
 - Explored **LLM/GenAI-based user representation learning**, knowledge distillation, and agentic personalization for next-generation Ads Intelligence systems.
- 08/2024–Present **Graduate Research Assistant, Stony Brook University**, Advisor: Xiaojun Bi
- Developed LLM-powered decoding systems, enabling hands-down ten-finger typing and gesture-based input without additional hardware (CHI 2026)
 - Fine-tuned FLAN-T5 models on large-scale synthetic and real noisy-to-clean pairs, achieving substantial gains over statistical baselines.
 - Built a Unity-based VR system integrating tap typing and word-gesture typing with a cloud-deployed LLM decoder (IEEE VR 2025)
- 07/2023–04/2024 **Research Intern, Simon Fraser University**, Advisor: Xing-Dong Yang
- Developed design tools for textile-based haptics, and algorithmic generation of lattice structures and guiding marks for 3D-printed tufting artifacts
 - Built a purely textile sensing interface enabling wireless power transfer and data acquisition on multi-sensor circuits (CHI 2025)

SKILLS

- Programming Python, C, C++, C#, Java, Verilog HDL, Assembly, SQL, Shell Script
- Frameworks PyTorch, TensorFlow, Android Studio, Django, Flask, Unity
- Tools MySQL, MongoDB, AR/VR Development, 3D Printing, Matlab, CMake
- Fabrication Circuit Soldering, Sewing Programming (e-textile fabrication), Textile Weaving
